

Make every citizen's life easier and safer

Safeguard their identity with IDEMIA's virtual credentials and Microsoft Azure Active Directory

We live in a world where physical and digital identities are not safe

37B

Number of records compromised in 2020, a 141% increase compared to 2019.¹

80%

Of data breaches in 2020 that involved customer PII.²

119K

Threats detected per minute in 2020 with more than 16 million COVID-related threats detected.³

We need a better way to control access to resources while preserving privacy

The rise of identity theft

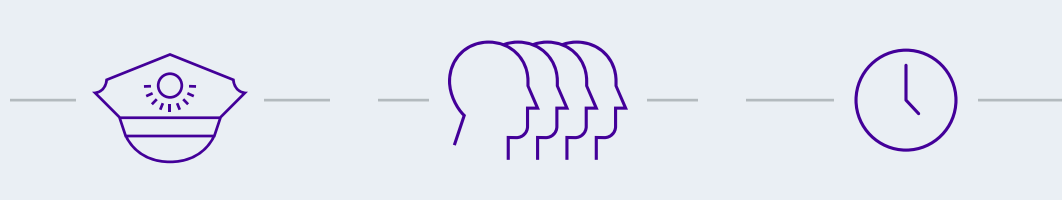

Identity theft and fraud risks are greater than ever before.

Tedious identity verification processes

Users must repeatedly prove their identity across devices and services.

Time-consuming password recovery

Requiring password resets and KBAs causes customer friction.

IDEMIA verifiable credentials safeguard identity across channels

Protect privacy and reduce fraud

IDEMIA's advanced identity verification tools provide an authoritative proof of identity. Add this to the Microsoft Azure AD decentralized identity solution.

Simplify the user experience

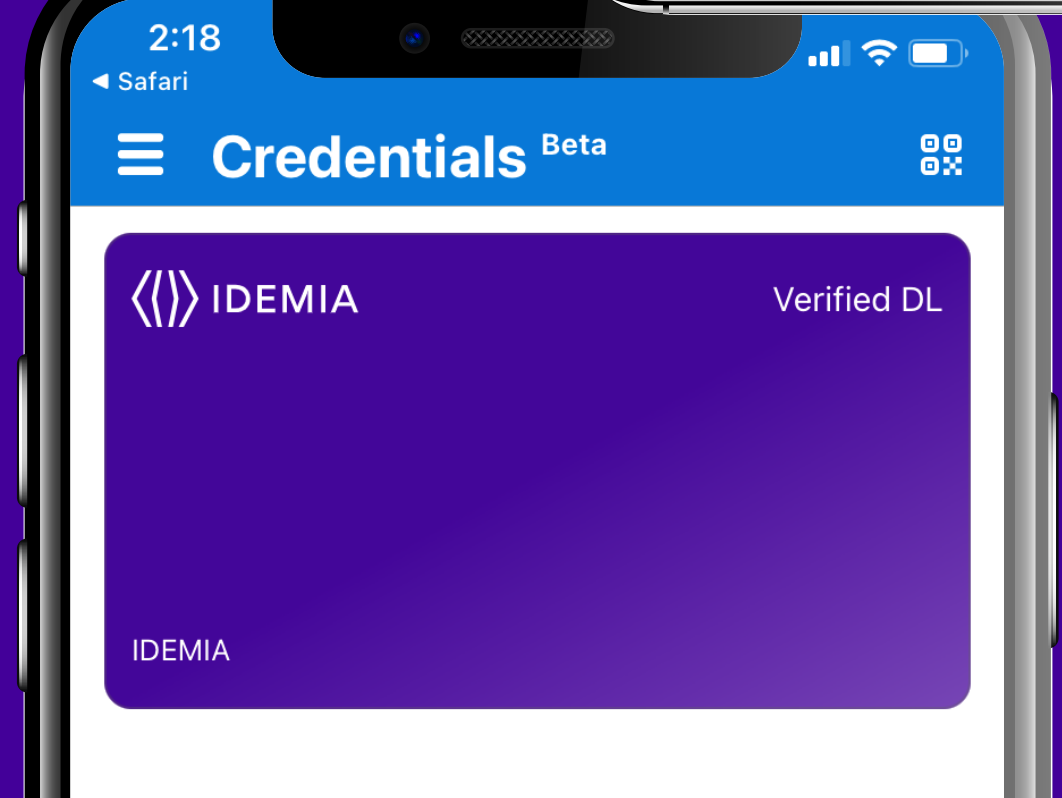

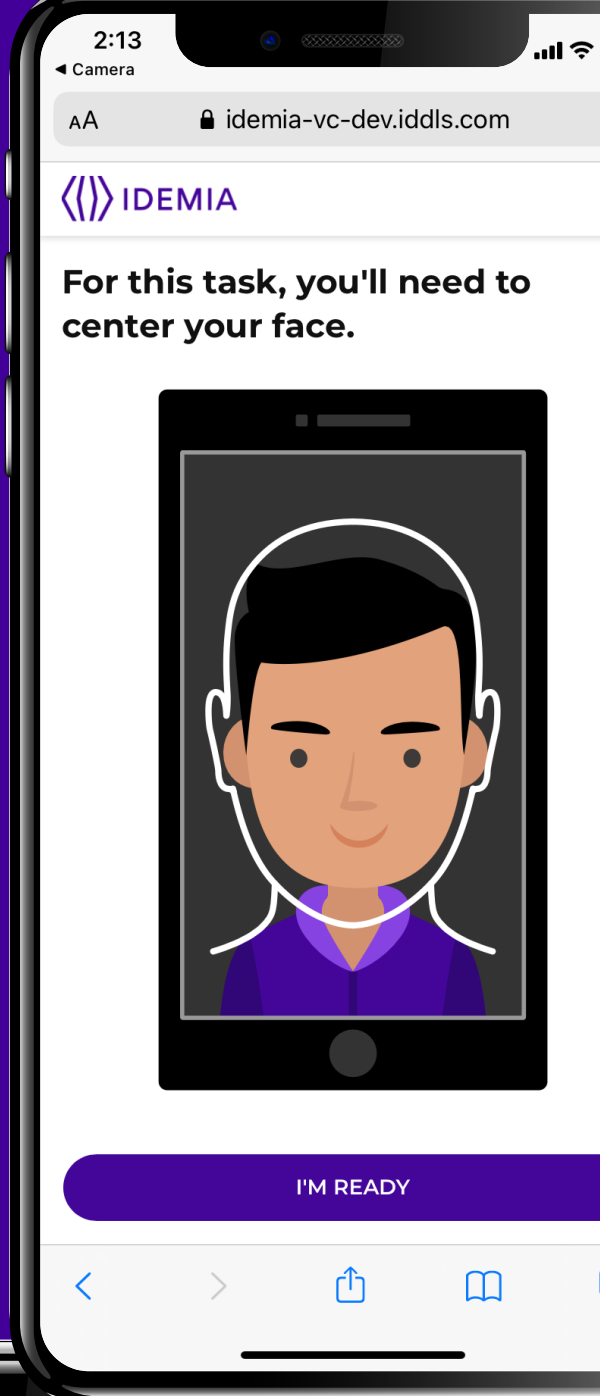

Digital verifiable credentials replace physical identity documents to enable seamless verification across channels.

Empower users to regain full control over their personal information with a single digital wallet.

Save time and cut costs

Enable users to self-serve and reset passwords in a matter of seconds with the simple scan of a QR code.

Eliminate manual intervention and conserve IT resources.

Why choose IDEMIA verifiable credentials?

- Identity gold standard**
 IDEMIA offers the only solution that compares a citizen's facial biometrics and biographic information 1:1 against their official DMV record.
- Proven leaders in biometrics**
 Ranked #1 in the NIST Face Recognition Vendor Test in March 2021.
- Global leader in credential issuance**
 Leading producer of US drivers' licenses and provides identity credentials in more than 180 countries.
- Global leader in Telecom & Financial Services**
 Over 900 million SIM cards shipped in 2020 and 800 million payment cards in 2020.
- Identity on the Edge**
 IDEMIA's unique Identity on the Edge design philosophy means that IDEMIA is committed to not taking custody of PII.
