IDEMIA

IDEMIA STORM ABIS

The industry's first cloud-native Automated Biometric Identification System (ABIS), enabling state-of-the-art fingerprint searches for local law enforcement agencies

ACCESSIBLE

Securely and conveniently connect through a web browser from anywhere—home, office, or in the field. No dedicated hardware required.

INNOVATIVE AND SCALABLE

Continuous updates of algorithms, features, and security patches, so you always have the latest technology. Supports room to grow as your needs grow.

INDUSTRY-LEADING ALGORITHMS

Built with IDEMIA's MBSS state-of-the-art biometric matching algorithms, STORM ABIS delivers the highest levels of accuracy.

DESIGNED BY EXAMINERS FOR EXAMINERS

Intuitive user interface improves examiner efficiency and reduces training time by putting all necessary comparison and analysis tools at their fingertips in an integrated environment.

AFFORDABLE

STORM ABIS is designed to work out-of-the-box with minimal set-up time needed, and its subscription pricing model provides predictable year-to-year budgeting.

Key Benefit

RANKED #1
NIST ELFT
All Latent Print Searches

IDEMIA provides the best fingerprint matching technology on the market today. Our tenprint, palm, and latent algorithms are trusted by **over 200 agencies** worldwide.

PRODUCT FEATURES

- Tenprint QC and comparison
- Livescan submissions
- Palm print support
- Person and record management
- Latent documentation

- Latent case management
- Latent search and comparison
- Case AFIS searches
- Interfaces with State AFIS and FBI NGI
