

ID2Secure

End-to-end HSPD-12 PIV card enrollment and issuance credentialing solution

20 YEARS AS THE LEADING PROVIDER OF FEDERAL PIV AND CAC CREDENTIALS

IDEMIA's ID2Secure delivers a holistic solution for credentialing, enrollment, issuance, management, and activation of Federal employees and contractors, and Personal Identity Verification (PIV) cards, as laid out in HSPD-12. ID2Secure accelerates enrollment and improves efficiency, saving time and money in the most secure way possible. IDEMIA also utilizes a central print bureau that includes electronic, graphical, and print personalization.

IDEMIA offers mobile enrollment, remote in-person proofing, a nationwide network of in-person enrollment locations, Supervised Remote In-Person Proofing (SRIP), and Remote Identity Assurance Level 1-3 (IAL1-3) certified document authentication and identity verification capability.

ID2Secure is cloud-based for easy deployment, and is interoperable. The solution uses best-of-breed Commercial Off-the-Shelf (COTS) credentialing products that are based on Federal Information Processing Standards (FIPS) 201-3 and open standards.

KEY FEATURES

- Single turn-key solution that meets all regulations and requirements
- Highly modular platform, with interoperability between system components
- Personalized to grant varying levels of access to facilities and information systems
- Shorter path to updates with fewer touchpoints
- Leverages IDEMIA's PIV credentials, which are used in more than 150 federal agencies throughout North America

Key Benefits

NEW V8.2 PIV CARDS

Three times faster than previous card versions for physical access

3-4 TIMES FASTER

at card initialization and activation, document signing, encrypting/decrypting emails

REDUCES FRICTION AND INCREASES COMPLIANCE

PIV AND CAC

Each card is FIPS 201-3 and FIPS 140-3-compliant with the National Institute of Science and Technology (NIST) and Federal Identity Credential and Access Management (FICAM) specifications, possible in under one second.

THE ONLY PROVIDER WITH AUTOMATED DOCUMENT AUTHENTICATION AND IDENTITY VERIFICATION

ID2SECURE CAPABILITIES AND COMPONENTS

Enrollment Solutions

- In-person, re-enrollment
- Mobile IAL2 enrollment
- 1,600 enrollment locations nationwide
- Supervised Remote In-Person Proofing (SRIP)
- Identity document verification against over 4,000 global identity documents

Identity Management System (IDMS)

- Data normalization
- Secure repository that interoperates with the CMS and Enrollment system
- Ability to integrate with agency systems such as Active Directory

Credential Management System (CMS)

- Manages the lifecycle of PIV card certificates, derived credentials, alternate tokens, and FIDO2 passkeys

Certificate Authority (CA) agnostic

- Interoperable with all commercial and federal CAs

Central Print Bureau

- Electronic and graphical personalization
- Cards mailed to customer or preferred secure site

Workstation capable for local enrollment and issuance

Orchestration Services

- Integrated upstream/downstream systems

ADDRESSES PAIN POINTS, INCLUDING:

- HSPD-12 and FIPS 201-3 compliance
- Compliance with government-wide policies, cross-agency priorities, and strategic government initiatives
- Embedded proprietary systems
- Maintaining up-to-date solutions in accordance with federal ICAM policy
- Staying current with vendor releases
