

Camera Tower PRO

A modern, flexible solution for fast service and high-quality photo capture

COMPREHENSIVE DRIVER ENROLLMENT AND ISSUANCE SOLUTION FOR DMVS

IDEMIA's made-in-the-U.S.A. camera towers take more than 40 million quality portraits each year. The new Camera Tower PRO is designed specifically for the high volume, image service, and high-quality demands of driver licenses and government ID issuers, capturing superior 2020 AAMVA DL/ID CDS-compliant digital images in a variety of ambient lighting conditions. The Camera Tower PRO provides maximum automation and minimum user involvement. Its software-driven autofocus lens system automatically centers on the customer's face and readjusts as the customer shifts.

A RELIABLE, EASY TO USE CAMERA TOWER, GUARANTEEING PORTRAIT QUALITY

Driver licenses and government ID issuers need to provide customers with fast service and reduced wait times, while taking high-quality photos of them. The design of the IDEMIA Camera Tower is based on decades of experience and is built with professional grade construction. It includes an integrated all-new digital flash and digital camera, enabling ideal lighting and consistent portraits with a dedicated flash bulb.

To improve flexibility and improve customer service the Camera Tower PRO has the following additional features:

1. Reduced size and footprint with an innovative new design to improve applicant sightlines.
2. Camera head with adjustable tilt (+- 30 degrees) to add more flexibility for installation.
3. Integrated USB ports to allow connection of additional devices and reduce cable clutter on the desktop.

Key Benefits

PHOTO QUALITY COMPLIANCE

Operator receives immediate confirmation of AAMVA and ICAO compliance.

REAL-TIME VIEW

Live video allows operators to view what the camera sees and confirm the customer's position.

SHORTER WAIT TIMES

Portrait capture in two seconds or less helps reduce transaction time.
