Web Enrollment Tablet

Complete all-in-one remote device that offers efficiency, flexibility, and improved customer service.

The Web Enrollment Tablet using IDEMIA's Web Enrollment (WE) software is a lightweight device that allows processes usually performed at Motor Vehicle Agencies (MVAs) to be performed from anywhere.

IDEMIA's Web Enrollment software allows MVAs to quickly capture an applicant's photo and signature, and to perform one-to-one (1:1) facial biometric matching, photo image quality checks, and document processing for driver licenses and/or ID cards. **Now, all these functions can be performed from any location,** including nursing homes, jails, and disaster recovery areas—or at your office to reduce wait times.

Based on your state's requirements, the browser-based Web Enrollment standard software can be configured to use the appropriate devices for biometric enrollment (e.g., supported signature pad or applicant-facing touchscreen monitor, document scanner, document authentication devices, etc.). Web Enrollment integrates with the IDEMIA Back Office or third-party systems for issuance operations post-capture. The solution can be configured to meet any provider's custom requirements.

Key Benefits

STREAMLINED APPLICANT PROCESSING

Fewer clicks to complete a transaction, resulting in increased productivity and reduced wait times.

IMPROVED APPLICANT INTERACTION

Allows reps to focus on the customer in front of them, rather than on which button to push on the screen.

GUIDED WORKFLOWS

Intuitive, user-friendly design only displays actionable information necessary for the task at hand, reducing transaction time.

FLEXIBLE DEVICE SUPPORT

Enrollment workstation devices are integrated, and quality-tested with your agency's specific workflows to offer the best possible user experience.

ENROLLMENT TABLET SPECIFICATIONS

COMPUTING

- Intel® 12th Generation Core i5 Processor (vPro Technology Advanced Management Features)
- 12-inch LCD touchscreen
- 256 GB storage capacity
- Dual-cell battery, ExpressCharge™ Capable
- 65W AC adapter

PHOTO CAPTURE

- Integrated rear camera with flash and microphone for applicant photo capture
- Antiglare and outdoor viewing capabilities
- Web Enrollment software performs image processing and image quality checks
- Optional virtual backdrop feature with customizable color through Web Enrollment software

SIGN AND CAPTURE

- Use tablet for:
  - Applicant signature capture
  - 1:1 Biometric matching
  - Document capture and processing

DURABILITY

- Dust and water-resistant
- Drop tested from four-foot height

OTHER FEATURES

- Microsoft® Windows® 11 Pro
- 3 lb form factor
