IDEMIA National Security Solutions (NSS) provides proven identity security and authentication services to the U.S. federal government. Our biometric technology powers four out of five of the largest government identity databases. NSS delivers critical identity proofing for key biometric programs, including the Federal Bureau of Investigation (FBI) Next Generation Identification (NGI) and the Department of State (DOS). NSS multi-modal identity solutions are NIST-rated as top performers for speed, accuracy, and reliability.

WHAT SETS US APART FROM THE COMPETITION?

- Pioneer in Global Biometrics with 60+ years supporting US Federal Government
- AI Identity solutions enabling the future
- Biometrics supplier to FBI NGI, DOD Biometrics Enabling Capability (BEC), DOS Consular Affairs Facial Recognition System, and IC
- Year over year superior NIST ratings
- Superior engineering processes incorporating SAFe principles
- Dedicated Applied Biometric Center of Excellence where clients can explore, test, and engage with our solutions
- Top Secret Facility Clearance
- FOCI mitigated (Special Security Agreement) entity with full adherence to NISPOM regulations

CORE CAPABILITIES

Full-spectrum biometrics that empower large scale enterprise matching systems, user focused scalable databases, integration with other biometric systems, and customized workflows.

Physical security access technologies that enable remote and on-premise enrollment for visitors and staff, secure vehicle express lanes for gate entry and exit, passive facility surveillance, and a biometric management control system.

Multi-modal biometric enrollment that supports mobile, in-person assisted, or self service kiosks, 3rd party enrollment, remote identity verification for civilian and federal government enrollment, and identity proofing.

PAST PERFORMANCE

- Multi-domain systems fusing biometric, biographic, credential, and digital views of identity
- Multi-modal biometric systems for criminal justice, civil identity, border control, and intelligence community missions
- Unparalleled speed, accuracy, and scalability for fingerprint, face, iris, latent, and Fast-ID searches
